2AA-

This is one of a number of structures built in 1944 next to the anchorage apron near #1800, the Fire Station. The 1200 square foot building was built for \$2800.00 by RDM from plan WB-23-38, type "Bomb Site Storage-5," "Semi-Permanent," "Theater of Operations."

Building 1809 has a rectangular plan measuring 24 feet-5 inches by 50 feet-2 inches. It has a concrete foundation and floor, wood and concrete walls, drop-lap wood siding, and a gabled roof with asphalt roll siding. A 10-foot-by-40-foot section at the northeast side of the structure is entirely concrete. Exterior features include several ventilating flues, louvers and wall hoods. The windows are of double-hung wood sash type and the doors of glass and wood panel design. The interior was furnished with a 25 KW "Climax" auxiliary generating plant, the walk-in vault, plus a heater and lights. The building needs minor maintenance but appears to be structurally sound.
